

Title of the project : Show Your Green Energy Map

Short Description:

The project is about Developing interactive-maps of the region students live in, through its final result it will **present the green energy sources (wind, solar,...)** in the area where students live in . It is a project of building Digital European Citizenship skills and competences.

Language: English

Teachers: Jean-Louis TIMIN and Tanya BORISOVA

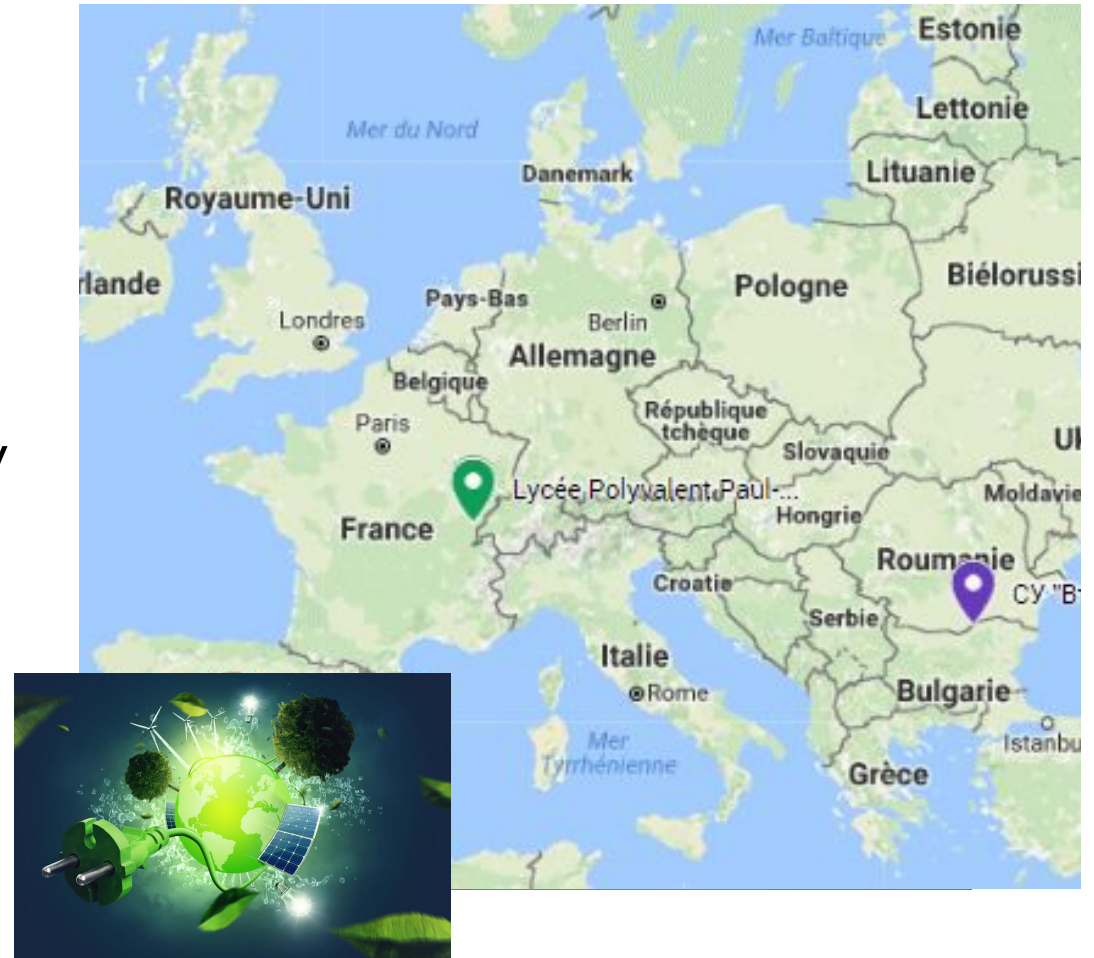

City / Country : Champagnole/FRANCE and Ruse/BULGARIA

Show Your Green Energy Map - to build the european map

AIMS:

Each pupil will have to **introduce an energy product system** (photos, vidéos,...) **close to their home**. They will try to visit and show the more interesting things they have discovered on the eTwinning space. **An European interactive map will be created** combining with the all groups' maps.

What is the project about ?

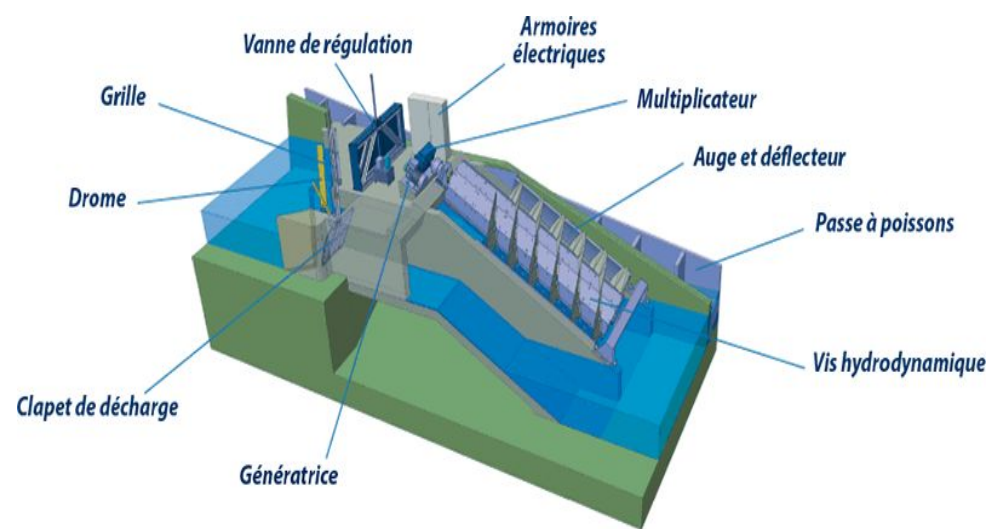

Show Your Green Energy Map - to learn more

Students will improve their communicative skills as they will have to work in teams and collaborate for the common task, which is a common final map. **By doing this they will learn more about their own environment and sources of energy.** As the project is designed to be mainly online maintained, they will develop their IT skills as their work will require using ICT.

Show Your Green Energy Map - **to value**

Technical information will be available to support the map (*provided and uploaded by teachers*) and all the school activities will be shared on eTwinspace.
